

Non-Wood Packaging Material Declaration

(in accordance with Announcement No. 2002/58, General Administration of Quality Supervision, Inspection and Quarantine of the People's Republic of China – AQSIQ)

Company: Amptown Cases GmbH
Address: Beckedorfer Bogen 24, 21218 Seevetal, Germany
Phone: +49 4105 55400-0
Email: info@amptown-cases.de

We, Amptown Cases GmbH, manufacturer of Amptown flight cases, hereby declare that the packaging material used in our products does not contain any solid wood, raw wood, bark, or other untreated wood material.

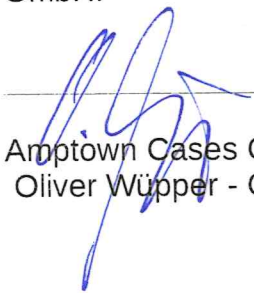

The material used is exclusively **birch plywood** (a processed wood-based panel product). During manufacturing:

- the veneers are peeled from debarked logs,
- the veneers are kiln-dried to a residual moisture content of less than 5%,
- the veneers are bonded and pressed under heat and pressure in a hot press at a temperature of approximately 130 °C.

This industrial process of heat, pressure and adhesive bonding reliably eliminates any risk of live insects, larvae, pupae, or other wood-boring pests, as well as bark residues, remaining in the finished plywood.

In accordance with **ISPM 15** (International Standards for Phytosanitary Measures No. 15) and the above-referenced Announcement No. 2002/58, this packaging material therefore qualifies as processed wood and is **exempt** from fumigation, heat-treatment (HT) marking, and phytosanitary certification requirements applicable to solid wood packaging material (SWPM).

This declaration applies to all flight cases manufactured and shipped by Amptown Cases GmbH.
